Watford City Community Survey Now Open

Watford City, N.D. — The leadership of Watford City and McKenzie County are seeking to learn more about the needs and wants of Watford City area residents by deploying a community survey. The feedback generated through this survey will support the creation of a vision, strategy, and action plan to support economic and community development.

“As we look to chart the next steps forward for our area, we want to be assured that our efforts and activities are reflecting the priorities of the broader Watford City community,” remarked Vawnita Best, Watford City Community Development Director.

To better inform Watford City’s and McKenzie County’s leadership as they undertake the planning process, input from the community is being solicited through several feedback mechanisms, including small focus groups and an online survey, which opened Monday, August 12th. The link to the electronic survey can be accessed at <https://www.cityofwatfordcity.com/>.

The survey closes on Sunday, September 22nd, 2019. Questions or comments regarding the survey or community planning process can be directed to Megan Laudenschlager (megan@strengthennd.com) of Strengthen ND, as they are supporting the work completed by Watford City’s leadership.
